

Dual-Pac Seal

Product Overview

The Dual-Pac Seal is designed for Bi-Directional sealing for both dynamic and static applications. The seal is designed to replace the need for bonded seals and o-rings with plastic backups. We can achieve high temperature and high pressure because of OEM's anti-extrusion back up system.

Features

- Bi-Directional Sealing
 - o Static
 - o Dynamic
- Field Tested
 - o Up to 15kpsi
 - o Up to 450°F
- Permanent and Retrievable Applications
- HNBR and FKM Material Options
- Replaces Multiple Bonded Seals
- Anti-Extrusion Backup System
- H2S and CO2 Resistant Options

Applications

- Completion
- Well Intervention
